

Own, rent or resale a piece of blockchain history.

Cryptoverse is an unusual advertising space built on a smart contract and a Universe-inspired theme.

It's also a tribute to the community (because the crypto space rocks!), and a fundraiser that we'd like to pledge to making decentralized technologies more accessible and ready for a wide use.

We intend to use a portion of the collected cryptocurrency to build new community tools and future platforms.

In a sense, Cryptoverse is a reincarnation of the vintage concept of the Million Dollar Homepage. If you were too young back then or you didn't care, here's your chance for redemption!

Apart from its 12-years old predecessor, this website is built on the Ethereum blockchain and the ownership of its 10x10 sectors is inscribed into tokens through a smart contract.

There's 10,000 sectors available. That's 10,000 CVS tokens in total. No more will be ever created.

It's not possible to split the tokens. 1 token = 1 sector. You own it or you don't.

CVS is an ERC20 token, thus sectors can change owners. Owners can change the sector content. Visitors may come more often to see the updates. And you can rent and resell the sector ownership.

The danger of Cryptoverse being a boring static page for the rest of the eternity was avoided!

We plan on extending the Cryptoverse concept to make this space more intense for both advertisers and visitors. If the fundraiser is successful, we will consult our plans with the community of token holders.

There's also a special game element!

The sector price isn't fixed. The base price is 1 ETH per 1 Cryptoverse Sector token (CVS). This price is dropping every 24 hours until it gets to 0.1 ETH per 1 CVS. However, every time somebody buys a sector it goes back to the original price.

You can therefore choose if you wait for a better price, or secure your favourite sectors right away!

Time elapsed since the last purchase	Sector price
less than 24 hours	1 ETH
1 day	0.80 ETH
2 days	0.65 ETH
3 days	0.55 ETH
4 days	0.50 ETH
5 days	0.45 ETH
6 days	0.40 ETH
7 days	0.35 ETH
8 days	0.30 ETH
9 days	0.25 ETH
10 days	0.20 ETH
11 days	0.15 ETH
12 days	0.10 ETH

Come visit Cryptoverse and claim your sectors at <https://cryptoverse.rocks>

We will enable the UI for changing the sector content during the CVS crowdsale.

If at least a half of the tokens is sold, we'll open a trading platform that will allow selling specific sectors.
